Skills

Languages: Java, JavaScript, TypeScript, SQL

Core java: OOP, Collections framework, Exception handling, Multithreading

Technologies & Tools: Node.js, Express.js, ReactJS, Tailwind, MongoDB, Git, GitHub, HTML, CSS, Rest APIs, Vercel, Hostinger, Render, Netlify

Internship

Open Gigantic Jan 2026 – April 2026

Backend developer Intern

- Developed and maintained scalable backend services using **Node.js**, implementing RESTful APIs for efficient client-server communication and data handling.
- Designed and managed MongoDB schemas for 9 collections, optimizing queries and indexing to cut average response time by 10%.
- Built and maintained 10+ RESTful API endpoints in Node.js/Express, supporting core client-server operations for the platform.

Project Work

- **Pinnacle Careers - Job & Recruitment Platform** Live Link GitHub
- Developed a full-stack recruitment platform using MongoDB, Express.js, React.js, and Node.js (MERN) to connect recruiters and job seekers.
- Built JWT-based role authorization for 3 user roles (Admin, HR, Candidate), securing 10+ API endpoints against unauthorized access.
- Implemented a job-pinning feature reducing time-to-find priority listings, tested across 20+ sample job postings.
- Created an HR directory module where candidates can access recruiter contact information for networking and career opportunities.
- Designed a resume upload and application-tracking system supporting PDF/DOCX uploads up to 5MB, used across 100+ test job applications during development.
- **Text-To-Image – 3D image generation** GitHub
- Engineered an AI-powered image generation platform enabling users to create custom visuals from text prompts, using the MERN stack and Generative AI APIs.
- Used async job queues to handle image-generation requests, reducing average perceived wait time by ~25% compared to synchronous processing.
- Integrated Generative AI APIs to process 50+ test prompts during development and QA.

Achievements

- Solved 200+ DSA problems across Leet Code & Geeks for Geeks in Java, covering arrays, String, Stack, LinkedList, Tree.
- **Patent Filed via University** "Data-Centric AI Platform for Real Estate Valuation, Investment Forecasting, and Secure Transaction Management".

Education

Lovely Professional University June 2022 - 2026

BTech in Computer Science and Engineering **CGPA** 7.48

Relevant Coursework: Object Oriented Programming, Databases, Discrete Mathematics, Operating Systems, Computer Networks, Full-Stack Development, DSA, Web Technologies

Certificates

- NPTEL: Cloud Computing Certification – IIT Kharagpur
- Udemy: Data Structure and algorithm- Java
